

## REGULAR SN-LINE

### Application

- EPS Regular SN-Line grades are **general-purpose expandable polystyrene integrated with graphite** for enhanced thermal insulation.
- Designed for producing grey insulation boards and construction elements where superior thermal resistance is desired without flame-retardant properties.
- The graphite content provides a significant improvement in insulation value compared to standard white EPS.
- An excellent choice for energy-conscious projects where building codes do not mandate flame retardancy.

Item	Unit	R200	R300	R400
Bead Size	mm	0,9-1,4	0,7-1	0,4-0,8
Foam Density	kg/m <sup>3</sup>	12-24	13-25	18-35

### Packing Type

- Standard Laminated Kraft Paper Bag (25 kg).
- 750 kg big bag with inside gas barrier liner.
- 1000 kg big bag with inside gas barrier liner.
- Octabin with inside gas barrier liner.
