

EPS SN-LINE

Application

- EPS SN-Line grades are **flame-retardant expandable polystyrene containing graphite** for superior thermal insulation performance.
- The ultimate choice for high-performance insulation boards, External Thermal Insulation Composite Systems (ETICS), and architectural profiles.
- Integrated graphite particles act as infrared absorbers and reflectors, significantly reducing heat transfer and improving R-values.
- Provides premium insulation properties for energy-efficient construction.

Item	Unit	F105	F205	F305	F405
Bead Size	mm	1,2-1,8	0,9-1,3	0,7-1	0,4-0,7
Foam Density	kg/m ³	12-20	13-20	15-23	20-35

Packing Type

- Standard Laminated Kraft Paper Bag (25 kg).
- 750 kg big bag with inside gas barrier liner.
- 1000 kg big bag with inside gas barrier liner.
- Octabin with inside gas barrier liner.
